

March 23, 2020

Dear Customers, Suppliers, and Partners:

CMT has been carefully monitoring the situation surrounding COVID-19 and while the condition in China has dramatically improved, we are just seeing the beginning of it in the United States. Most of our production facilities in China are operating at 90% + capacity with this number increasing daily. Your account manager will work with you to communicate shipment status for parts that are being sent direct to you from China or let you know of any possible disruptions for those parts being warehoused.

Ohio has issued a shelter in place which will go into effect Monday March 23rd and last until April 6th. CMT has been classified as an essential business as we are part of the supply chain that sells to critical products and industries. All staff that can complete their jobs from home will be doing so and will continue to be available via mobile phone or email. Our warehouse will remain in operation to handle incoming and outgoing shipments.

Please feel free to reach out to any of your CMT contacts as we are here to support your business in the best and safest way possible. Our number one concern is the health and safety of those around us and we hope you remain safe during this global pandemic.

Sincerely,

Emily Triantos
President, CMT Imports
